

CYBERSECURITY · RISK MANAGEMENT

Introduction to Cyber Risk Management

▲ 7 chapters

▲ Identifying, assessing, mitigating and governing cyber risk

7 CHAPTERS

▲ Training programme

1 Introduction to Cyber Risk

1.1 Cyber Risk Management

- ▶ Current challenges
- ▶ Training objectives

2 Cyber Threat Landscape

2.1 Main cyber threats

- ▶ Phishing
- ▶ Ransomware
- ▶ Business Email Compromise
- ▶ DDoS attacks
- ▶ Data breaches

2.2 Threat drivers

- ▶ Human weaknesses
- ▶ Organisational gaps
- ▶ System complexity

3 Cyber Risk Identification

3.1 Critical assets

- ▶ Data
- ▶ Systems
- ▶ Services

3.2 Vulnerabilities

- ▶ Technical
- ▶ Organisational
- ▶ Human

3.3 Incident scenarios

- ▶ Likelihood
- ▶ Impact

4 Cyber Risk Assessment

4.1 Risk assessment objectives

- ▶ Criticality
- ▶ Prioritisation

4.2 Risk evaluation

- ▶ Probability
- ▶ Impact

5 Risk Mitigation and Management

5.1 Prevention measures

- ▶ Access controls
- ▶ System updates
- ▶ Encryption

5.2 Detection mechanisms

- ▶ Monitoring
- ▶ Alerts
- ▶ Logging

5.3 Incident response

- ▶ Response plans
- ▶ Testing and drills

5.4 Recovery

- ▶ Business continuity
- ▶ Disaster recovery
- ▶ Backups

6 Cyber Governance and Awareness

6.1 Cyber governance

- ▶ Management oversight
- ▶ Security roles
- ▶ Compliance functions

6.2 Security culture

- ▶ Awareness
- ▶ Daily vigilance
- ▶ Incident reporting

7 Conclusion

SECURITY CULTURE

Awareness, daily vigilance and incident reporting.
